Capability  
**Statement**

## Summary

Pete Morgan Technology Pty Ltd was established by Pete Morgan, Director & Founder, for ICT strategy, program & project leadership, oversight and delivery across Queensland.

20+ years of experience spanning island resorts, government buildings, commercial construction, enterprise offices, and regional businesses, working with CEOs, CIOs, owners, and tradesmen, across large projects and small.

Bundaberg-based, serving Queensland from Brisbane to Townsville.

## Service lines

### **Strategic ICT Assessment & Roadmap**

Current-state review, gap analysis and technology roadmap for ICT scope.

### **Project & Program Leadership**

Embedded ICT project and program management and vendor coordination across construction and fit-out.

### **Independent Program/Project Oversight**

Third-party governance of ICT packages, vendor performance monitoring, executive reporting.

### **Technical Delivery & Implementation**

Infrastructure design, system deployment, integration, documentation, and knowledge transfer.

## Regional Delivery

Almost two decades delivering projects across regional and remote Queensland – a breadth and depth of experience across ICT and infrastructure that is rare, not constrained to one discipline. Working in the regions has its own challenges; operating within these constraints, being hands-on while also leading, is not only helpful but, in many cases, required.

Successful project delivery across construction and cloud infrastructure, on the tools with the trades, through engineering and design, project management and program development, to governance and leadership. References from CEOs, CIOs and trades. This differentiates Pete Morgan Technology from a single-trade contracting model.

# Some of the achievements

## Whitsundays – Hamilton Island

ICT and infrastructure for an entire island – airports, marinas, power generation, emergency services and resorts. IT Framework Transformation, 26 to 79 effective areas; Great Barrier Reef Yacht Club and Villas Greenfield ICT, Access Control and Fibre-to-the-Villa Distribution; independent Copper Network Review and Remediation, a \$1M+ external scope delivered in five months and transferred to Telstra for \$1.

## Airlie Beach, Mackay & Bowen – Whitsunday IT

Founded and grown to around 700 endpoints, 50 client businesses and 9 staff across two branches. Daydream Island Resort: Post-Cyclone Debbie ICT Reconstruction for re-opening.

## Proserpine – Whitsunday Regional Council

Through Whitsunday IT and DMK Industries. Administration and Local Disaster Coordination Centre, including 2.4km Fibre Backbone Design and Delivery; Annex and Administration Relocation; Annex to Water Tower Fibre Audit and Repairs; Water Tower Radio Infrastructure; Data Centre UPS Replacement and 3-Phase Rewire.

## Bundaberg – Murchie Constructions & Best Practice Software

RFDS Aeromedical Training Academy Greenfield ICT Build and Wintergarden Forum ICT Reconstruction. Best Practice Software: Infrastructure Modernisation and Identity Management Auditing, Design and Implementation.

## Townsville – TerreCom

Senior ICT Mentoring, ITIL  
MSP Infrastructure Design and Build.

“

"Pete is an experienced ICT infrastructure, telecommunications, and cloud migration professional who is not afraid to 'hands on' design, build, and deliver from the ground up. He is authentic and straightforward, not afraid to boldly identify and deliver ICT improvements when and where they're needed and brings an impressive work ethic and standards to a contract role or project. Pete brings great skills and knowledge in ICT project management, working at every level to deliver the customer's mission."

Craig Hodges,  
Chief Executive Officer,  
Best Practice Software

“

"Pete ran all on-island IT infrastructure, telecommunications, and technology operations for Hamilton Island under my direction. Not a single resort – an entire island. Airports, marinas, power generation, emergency services, luxury resorts, staff accommodation, and commercial tenants. He managed the complexity without making it complicated. I have recommended Pete to others since, and I would again without hesitation."

Maurice Hibbert,  
Chief Information Officer,  
Hamilton Island Enterprises

“

"Pete Morgan is the person I call when I need to talk through an infrastructure problem. Not because he is on contract – because I trust his judgement. He understands our environment, our constraints, and our people. He tells me the truth even when it is not what I want to hear. That is worth more than any technical skill."

Jordan Carroll,  
Director, Business Infrastructure,  
Best Practice Software

## Capabilities

IT Governance · Risk and Compliance · Change Management · Stakeholder Management · Vendor Management · Project Management · ICT Fit-out Delivery · Security Systems Advisory · Microsoft 365 · Azure · Intune · Endpoint Management · SCCM · Directory Services Design · Automation · Database Design and Development · Cisco · Network Design · Optical Network Design · Data Centre · Telecommunications Engineering · Audio Visual Design · Structured Cabling Design

## Credentials

### Panels and registrations

Local Buy LB308 ICT Solutions, Products, Services & New Technologies panel · ICN Gateway 1850979

### Licences

QLD Security Firm Licence (Class 2) 4940660 · QLD Security Provider Licence 4652716 · ACMA Registered Cabler 43150 (S, C, F)

### Insurance

Liberty Mutual: Professional Indemnity \$10M · Public Liability \$20M (Policy IE-SY-SPC-12-128341, expires 01-03-27)

### Memberships

Australian Computer Society (MACS) · Project Management Institute · ASIAL Corporate Member · Bundaberg & District Chamber of Commerce
